

12 Week Dental Assistant Training Program - \$2495 1 Day Per Week or 2 Evenings

See our website for class dates. www.academy4da.com/schedule/

Our 12-Week Dental Assisting Training Program will provide dental assisting training to students as a pathway to enter the dental profession as an entry-level dental assistant.

Before a dental assistant can be qualified to work with a dentist, it is important to provide basic dental knowledge to the future dental assistant. This 12 week dental assistant training program teaches students the knowledge and professionalism that it takes to be a part of the dental workforce in this exciting healthcare field. This accelerated course allows an interested student to acquire the basic entry-level dental assisting knowledge to begin their new career in as little as 12 weeks.

We realize that some people learn better from a hands-on training approach rather than a lecture approach to education, therefore the Academy for Dental Assistants has developed a curriculum for dental assistant training for this type of learner. The course is delivered in a hybrid format allowing students to attend class 1 day per week to be taught dental assisting skills while completing the book work, homework and quizzes online at home on your time. The course is divided into 4 sections, each section will have a Clinical Test from the procedures you learn in class and a Written Test that will come directly from the textbook on the chapters assigned to that section. Hands on tests are done in class; the written tests are done online. This course does require the student to spend 6-8 hours per week outside of class time to complete workbook and textbook assignments.

COURSE OBJECTIVES:

The objective of this program is to provide students the opportunity for a career in the dental field where they can work alongside a dentist and be able to perform a wide variety of dental assisting duties. This program will prepare students for an entry-level position in the dental field. The materials presented in this program are delivered in a hands-on approach in an actual dental office not a traditional classroom setting. The students will be evaluated on their ability to perform the necessary clinical procedures delegated to a dental assistant in the dental office.

Skills learned in this program will be reinforced through a 200-hour internship (within a minimum of 3 months maximum of 12 months) in a dental office of your choice once the 12 weeks of instruction have been completed. Students are trained in the areas of dental terminology, patient care, and chair side dental assisting.

PROGRAM PATH:

Step 1: 12 Week Dental Assisting Training Program in our Facility

Step 2: 200 Hour Dental Assisting Internship in a Dental Office of your Choice

Step 3: Student Awarded Florida EFDA and Dental X-ray Certifications
State tests are included in the 12 Week Program - ACCREDITATION with the Florida Board of Dentistry

WHATS NEXT?

We take a maximum of 10 students per class, your spot is not guaranteed until you have registered and we have received your deposit.

To register for a class you must go to our website and Select “All Courses” button on the top of our Home page. You will then add the class you want to your cart and Select “Check Out”. You will then enter your personal information and set up a Username and Password that you will use to log in and out of the course throughout the 12 weeks to access course material and submit your quizzes. Make your payment either deposit or payment in full, once your credit or debit card has been approved you will be directed to “Choose a Class Date”. Select the class date you want to attend; Mondays, Monday/Wednesday Night or Saturdays. Once your deposit or payment in full has been received you will have access to the course Introduction and Section 1 material.

We offer in office financing with \$600 down and 12 weekly payments of \$170.

Student Responsibility
